Second Stage Dispersal

500 Mated Ewes & 13 Stud Rams

Tuesday 3rd March 2026, 12 noon SA time
at "Illoura" – 392 Old Dukes Hwy, Moorlands 5301

Lunch & Refreshments provided

- ❑ Entire Illoura flock have been DNA tested
- ❑ Ovine Johnes MN2 Status (No. S 10)
- ❑ Ovine Brucellosis Accredited Free (No 23)
- ❑ Footrot Free
- ❑ All sheep dipped annually (Zinjet)
- ❑ All sheep fully vaccinated with Glanvac 6 with B12 & Eryvac
- ❑ Drenched at weaning and 1 summer drench
- ❑ Treated with Scabiguard

UNDERSTANDING ASBV's

Australian Sheep Breeding Values

- BWT** Rams with lower ASBVs for birth weight (BWT) produce lambs with lower birth weight. Both low ASBV's (lamb survival) and high ASBV's (lambing difficulties) should be avoided to ensure maximum lambing percentages. The correct BWT ASBV for you will depend on the type of ewe that you are breeding from and the level of nutrition of those ewes
- WWT** Rams with a more positive ASBV for weaning weight (WWT) will, on average, produce lambs that grow quicker up to weaning age.
- PWWT** Rams with more positive ASBVs for post weaning weight (PWWT) produce lambs that grow quicker and reach target weights in the 6 – 9 mth time frame.
- PFAT** Rams with a more negative ASBV for fat will produce lambs that are leaner, at the same weight. Again, the correct PFAT ASBV for you will depend on the type of ewe that you are breeding from and the level of nutrition available.
- PEMD** Rams with more positive ASBVs for eye muscle depth (EMD) produce lambs that have more muscle (independent of weight) and a higher lean meat yield.

INDEXES

An index is a guide to the value of a ram for a particular market. Rams with higher indexes have balanced figures that will produce lambs that are more suited to that particular market target. It is important to understand what market the index applies to before using an index.

- TCP** The Terminal Carcase Production (TCP) index aims to achieve gains in growth and muscle while increasing lean meat yield and eating quality
- LEQ** The Eating Quality index is targeted at terminal producers interested in improving the meat eating quality of their prime lambs while continuing to improve production traits in a balanced way

LATE NOTICE

**While the TCP, LEQ, BWT, WWT & PWWT Breeding Values are ASBV's,
all other Breeding Values are Flock Breeding Value's**
